For the traditionalist, the lightweight and comfy **Brenthaven Pro 15/17** (★★★★☆; \$179; www.brenthaven.com) fits the bill. Although marketed specifically for Macs, we won't tell if you use it to tote another brand. It's made of black, military-grade ballistic nylon, and the rear section is padded by the patent-pending CORE protection system—the compartment even adjusts to your notebook to get the snuggest fit possible.

5 Brenthaven's patent-pending CORE protection system adjusts to fit your notebook.
