## Brenthaven Fusion MB

£40

Buy from [www.brenthaven.com](http://www.brenthaven.com)

OVERALL ●●●●●

Good Stylish: sturdy; lots of pockets  
Bad None

If you find rucksacks a little too informal to carry your laptop around in, then the Brenthaven Fusion might well be for you. It's a laptop messenger bag made from tough ballistic nylon, but is classy enough to use comfortably with business attire.

The inside of the bag is a single capacious compartment, and a large padded sleeve sits inside this for laptop carrying. The sleeve has sprung side cushions that allow it to accommodate laptops with screens from 12" to 15.4", although larger sizes are a tight squeeze.

We like lots of pockets on laptop bags and the Fusion MB doesn't disappoint. There's a small zipped pouch and a handful of smaller pockets underneath the bag's front flap, a larger zipped pocket on the flap itself, plus a magazine-size pocket on the rear. A mesh bag also pops out of a zipped pocket on one side for carrying a water bottle. Add in a removable, well-padded shoulder strap and the Fusion MB is a bargain at the price.
